

Become our new

Junior Business Process Specialist (m/f/d) Logistics Application Testing & Training

Do you say you get to the heart of the issue, decide and act through the customer's eyes and inspire confidence? Then you're the perfect fit for us.

Your responsibilities at C&A

- Testing of newly implemented systems and processes in the area of Supply Chain Management (e.g. Transport Management System and Warehouse Management System)
- Support the design and development of training programs (3rd party and in-house) in order to onboard colleagues in all of our warehouses to new systems and processes
- Design and conduction of test cases for the different test steps (application, interface, user acceptance test)
- Planning, execution and success tracking of all testing activities
- Cultivate and maintain effective working relationships with a variety of stakeholders in the area of testing and training as well as in project and operational surroundings

At C&A you can look forward to:

- An interesting job in an international working environment
- You will receive an in-depth induction into your new role and you will have the opportunity to participate in a variety of trainings
- A positive working atmosphere with helpful colleagues and corporate events
- A listening ear to your ideas and an opportunity to discuss them
- In addition, you will enjoy attractive discounts, a subsidised canteen and a public transport travel pass

What we expect of you

- University degree (Master preferred) in Supply Chain or Logistics Management or equivalent professional experience with general understanding of retail supply chain, preferably in Fashion/Apparel
 - Interest in and basic understanding of IT systems - on the job you will become domain expert in the newly implemented systems and processes
 - Analytical skills to understand user needs as well as complex processes or process chains together with the ability to understand the impact of change on the systems interdependencies
 - Presentation skills and good communication skills to describe processes and systems and the ability to translate complex descriptions and terminology in practical terms
 - Fluency in English and minimum good German language skills is a must, additional language skills (e.g. French, Spanish, Dutch, Slovak) of advantage
- Please note: this position will involve travels across Europe

We offer a permanent contract. Anticipated start date: 1st September 2020 (negotiable).
